

## Innovation Consultancy

Our experience in innovative projects allows us to develop from idea to product, process or service defined for marketing and economic impact on the company.

We use the following bases:

- Management and training of talent.
- Research, innovation and improvement.
- Management of change and growth.
- Internationalization of innovation.
- Diagnosis and Strategic Plan of innovation.

To achieve the following objectives:

- Saving resources in innovation activities.
- Improved staff motivation and involvement.
- Improved corporate image.
- Return of the technological process.

Methodology based on the sum of:

### **Research + Innovation + Growth**

#### **Program management of innovation:**

##### **PHASE I: Technology Watch**

- Monitoring of current technologies.
- Internal Analysis: Capacity developed
- External Analysis: Market Potential

##### **PHASE II: Feasibility**

- Selection of ideas.
- Project Definition
- Study of technical and economic feasibility

##### **PHASE III: Design**

- Basic Design.
- Detailed design and pilot testing.

##### **PHASE IV: Industrialization**

- Redesign. Proof.
- Industrialisation and production.

##### **PHASE V: Marketing**

In addition we can focus on more specific projects such as:

- Technology monitoring programs.
- Development and implementation management systems R & D.
- Plans for industrial innovation.
- Strategic Plan for Innovation.
- Management and processing of EU and state programs
